DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

2. Claims 1-6 are objected to because of the following informalities: Claim 1, line 7, "it" should be changed to --the deposit and withdrawal module-- and claims 2-6, line 1, "An" to be changed to --The--. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Katou et al, US Patent No. 6,422,458.

Katou et al disclose a bill deposit/withdrawal machine comprising: an automatic voucher machine for depositing and dispensing vouchers, having a housing (see col. 7, line 51+ and figures 5A, 5B) which can be closed and has a recess for depositing and dispensing vouchers (see col.8, line 6+ and figure 14), and having a depositing and dispensing module (see figures 14, 15, 17, reference sign 216), and having a processing module (see figure 6, 'temporary storage box', 'bill discriminating unit' and 'transport paths'); the depositing and dispensing module can be pivoted between a depositing and dispensing position and a processing position (see figures 14-

Art Unit: 2876

18 and col. 8, line 29+); the pivotable depositing/dispensing module achieves the aspect of having a low overall height on account of being pivotably mounted.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No.: 5,540,425 and 2,914,244.
